Features and Benefits

One piece rivetless copper alloy spring contact arm and terminal plate assures proper contact alignment reducing heat rise. Large silver cadmium oxide contacts reduce contact erosion and prevent welding, providing long life.

Thermoplastic elastomer rocker assures precise alignment of carbon steel coil compression spring. Permanently lubricated assembly provides long life and trouble free operation.

Heavy duty nylon toggle resists abuse and chemical attack making it suitable for use in the toughest environments.

One piece integral grounding terminal with #8 brass screw allows compliance to NEC®. Stainless steel automatic grounding clip assures grounding continuity between mounting strap and metal wall box. Steel nickel plated mounting strap provides a corrosion resistant finish.
