## Hospitality Key Card Switches

Leviton key card switches are designed to provide energy savings for the hospitality industry by ensuring that no devices are left on when the room is not in use. These switches control electrical circuits by simply inserting or removing the guest's access card into the device. Both line voltage and low voltage switches are available for application flexibility.

### Features and Benefits

- Functions as dependable vacancy sensor when guest leaves and removes card
- Reduce energy costs by ensuring circuits are ON only during occupancy (when key card is in switch)
- Attractive low profile design with color change kit to meet the most common room designs or décor
- LED lighting illuminates the card slot for easy location in a dark room
- High Inrush Stability (H.I.S. Technology)
  - Zero crossing circuitry optimizes relay operation for reliable, long-life operation
  - Robust mechanical latching relay is durable for all load types
- No neutral model (HKSWP-GDX) is specially designed for retrofit applications where neutral wires are not available
- Low voltage model is compatible with applications utilizing building automation systems, energy management systems, and lighting control panels
- Fully rated to protect the entire circuit with UL Listing and 20A relay

### Hospitality Key Card Switches

| Cat. No.   | Description   |
|------------|---|
| HKSWP-0DX* | Hospitality Key Card switch with color change kit, 120-277V             |
| HKSWP-GDX* | Hospitality Key Card switch with color change kit, 120-277V, no neutral |
| HKSWP-0LX* | Hospitality Key Card switch with color change kit, 24V                  |
| HKSWP-00G* | Faceplate, Gray, 25 pack  |
| HKSWP-00E* | Faceplate, Ebony, 25 pack   |

\*All HKSWP models ship with the Color Change kit — includes a White, Ivory and Light Almond faceplate
