

Single Location to Enterprise

Multi-location energy management and sophisticated lighting control for offices and small commercial buildings using easy-to-install devices. Lumina Gateway supports dozens of lights, thermostats, water heaters, pumps, generators, and a wide variety of smart devices. The Lumina system provides anywhere access and total control of every business location from your mobile device with the Lumina app or Cloud Dashboard.

Total Control of Every Property

- Simplified task and time-based automation
- Enterprise features including role-based authority and ability to manage corporate schedules and holidays for all locations
- Access multiple locations via app or web portal
- Dim/Brighten/On/Off control over lighting loads
- Adjust heating / cooling setpoints

Common System Components

Description	Cat No.
Lumina™ Gateway Hub	74A00-1
Leviton Cloud Services	Free at LCS.leviton.com
Lumina™ RF Motion Sensor	LURMD-00W
Lumina™ RF Door/Window Sensor	LURDW-00W
Lumina™ RF Ceiling Mount Occupancy Sensor - 450 Sq/Ft	ZSC15-IxW*
Lumina™ RF Decora® 0-10V Wall Dimmer, 120-277VAC	ZSD07-AxZ*
Lumina™ RF 120/277VAC 10 Amp Switch (Can also be used as a 3 way)	ZSS10-NxZ*
Lumina™ RF 15 Amp Plug-In Appliance Control Module	89A00-1ZB
Lumina™ RF Universal Thermostat	RC-1500WHZB
Lumina™ Gateway app for iOS and Android	Free download at iTunes Store and Google Play

Multi-Location Automation

Scalable Solutions
for Every Building

Smart Automation Solutions - System Overview

Leviton Cloud Services App

Lumina Gateway's iOS and Android apps allow for quick and easy monitoring and adjustment of lighting, temperatures, and heavy-duty loads like fountains, pumps, and generators from anywhere in the world. Control multiple locations by viewing a map and every connected business location, ideal for franchisees and multiple property business owners.

For more information contact your local rep or visit www.leviton.com/gateway

Lumina™ Gateway Hub

The brain of each location coordinates wireless devices, provides remote access as well as text/email notifications, and facilitates automation activity to each room or device. Utilize one in each location and connect all locations to any computer or mobile device. Easily add new smart devices and create multi-location schedules.

Lumina RF Wireless (PIR) Occupancy Sensor

Self-powered, wireless sensor easily mounts on ceiling or surface. Provides advanced motion detection and a 360° field of view.

Lumina RF Decora® 0-10V Wall Dimmer

Allows wireless dimming of any 0-10V controlled load with ON/OFF and raise/lower control. Replaces traditional single-pole wall switches, no additional wiring required.

Lumina RF 15 Amp Plug-in Load Control Module

Automatically turns small loads on/off, perfect for appliances, fans, and lamps.

Lumina RF Wireless Thermostat

Programmable communicating thermostat provides precise digital temperature control over HVAC systems.

Lumina RF Motion Sensor

Wireless motion sensor discreetly mounts in the corner of a room for occupancy based energy management.

Lumina™ RF Door/Window Sensor

Easily applies to doors and windows for open/closed status and automation.
