

Fuse Pullers/Clip Clamps

Plastic Fuse Pullers

Mersen plastic fuse pullers are fully insulated, made of high-dielectric, reinforced plastic with notched handles to provide a safe grip. Stronger and more durable than fiber pullers, they are permanently marked with the recommended fuse ampere range. Yellow color for safety.

Catalog Numbers

Catalog No.	Description		Use with Fuses		
	Size	Length (in)	Ampere	Volts	Diameter (in)
34-001G	small	5	0-30	32-250	9/32-1/2
34-002G	pocket	7-1/2	0-100	250 600	-
34-003G	large	11-3/4	31-600 31-400	250 600	-

Plastic Fuse Clamps

Mersen fuse clip clamps are used to clamp fuse clips together onto a fuse ferrule or blade. An easy twist of the cap tightens the jaws against the clip, preventing heating by reducing resistance at the point where fuse and clip make contact. This helps prevent loss of spring tension due to annealing from overheating.

Catalog Numbers

Catalog No.	Use with Fuse Clips			Weight (ounces)
	Type	Ampere	Volts	
32-001G	Ferrule	30	250	2
32-002G	Ferrule	60	250	
32-002G	Ferrule	30	600	
32-003G	Ferrule	60	600	2
32-004G	knife blade	100	250	
32-005G		200	or 600	
32-006G*		400	600	8
32-007G		600		8

* Wide jaws permit clamping split clips.

Nylon Fuse Pullers

Mersen nylon fuse pullers are fully insulated, made of high-dielectric, high impact nylon with no-slip handles and protective finger stops for greater safety when inserting fuses. Yellow color for safety.

Catalog Numbers

Catalog No.	Description		Use with Fuses	
	Size	Length (in)	Ampere	Volts
34-015G	small	5	0-30	250
34-016G	medium	7-1/4	0-100 0-60	250 600
