## Wall Plates

## Types, Finishes and Configurations

Actual product may vary from photos shown above.

#### Wall Plates

## **Features and Benefits**

## **Only The Best Materials**

Hubbell offers a wide variety of configurations available in high-impact nylon and metal wall plates. In 1981, Hubbell was the first manufacturer to introduce nylon wall plates. Hubbell only offers plastic plates made of a high-impact material and does not offer wall plates made of materials that may be subject to breakage in abusive environments.

Hubbell offers only the best grade of stainless steel type 302/304, which is 18% chromium, 8% nickel, and non-magnetic providing superior corrosion resistance versus type 430 stainless steel. When you specify Hubbell wall plates you can be assured of the highest quality materials providing extended life in the most abusive environments.

### **High-Impact Smooth Nylon**

For Commercial, Institutional, Hospital and Industrial Applications.

- High-impact resistance limits access to live parts due to breakage.
- Contemporary smooth finish and contoured edges enhance installation appearance.
- Captive screw feature holds mounting screw in place for quick and easy installation.
- Positive "Bow" feature assures flush installation.
- Self-extinguishing nylon material.
- Smooth finish without recessed lines is easy to clean and maintain attractive appearance.
- Highly resistant to solvents and cleaning solutions providing long life in the harshest environments.
- Non-conductive material.

### Smooth Metal 302/304 Super Stainless Steel

18% Chromium, 8% Nickel

For Commercial, Institutional, Hospital and Industrial Applications.

- Provides extended life in abusive and corrosive environments.
- Contemporary smooth finish and contoured edges enhance installation appearance.
- Smooth finish without recessed lines is easy to clean and maintain attractive appearance.
- Satin finish hides fingerprint marks.
- Non-magnetic for static-free requirements.

#### Smooth Solid Brass, Anodized Aluminum and Metallic Plated Steel

For Commercial, Institutional and Industrial Applications.

#### **Smooth Solid Brass**

- Provides a plush appearance and durability of metal.
- Finish is coated to inhibit oxidation.

#### **Smooth Solid Anodized Aluminum**

- Non-magnetic and corrosion resistant providing suitability for a wide range of applications.
- Finish is coated to inhibit oxidation.

### **Metallic Plated Steel**

Available in a choice of chrome and brass finishes.

#### **Custom Metal Wall Plates**

Hubbell offers 40 custom configurations available in 5 metal finishes from 2-gang up to and including 8- gang configurations. These custom openings can be configured in any combination to meet your specific requirements.
