FEATURES
- Intact Intelligent Panels send network port status back to the Intact Device Manager, a 1RU Ethernet-enabled controller that hosts the system software

- During work orders and when alarms occur, LED lights provide guidance above affected ports on the panel

- Using Intact Device Hubs, one Device Manager can expand to support over 100 Intact panels

- Multiple Device Managers operate seamlessly, allowing systems to scale easily

- QuickPort® copper panels (1RU, 24-port) and SDX 2000i fiber enclosures (1RU, 2RU) are "intelligent-ready" and can be upgraded to become an Intact intelligent device while remaining on the rack

- Panels and enclosures can be upgraded without removing connectors, preserving the integrity of permanent link testing
